Java

```java
class Solution {
    public int maxCoins(int[] piles) {

    }
}
```

JavaScript

```javascript
/**
 * @param {number[]} piles
 * @return {number}
 */
var maxCoins = function(piles) {

};
```

C++

```cpp
class Solution {
public:
    int maxCoins(vector<int>& piles) {

    }
};
```

C#

```csharp
public class Solution {
    public int MaxCoins(int[] piles) {

    }
}
```
